In element B.4b, on page 6 of the Base Prospectus, the part related to Société Générale (indicated by the drafting instruction “[If the Issuer is société Générale]” is deleted and replaced as follows :

2014 was another challenging year for the economy, with global activity posting only moderate growth that varied by region. This trend is expected to carry over into 2015, which is shaping up to deliver a weaker-than-expected global economic recovery amid myriad uncertainties both on the geopolitical front and on the commodity and forex markets.

The euro zone is struggling to return to more dynamic growth, thus slowing the reduction of public deficits. Interest rates should remain at record lows, but the deflationary risk should be kept under control by the intervention of the ECB which has announced the implementation of a more accommodative monetary policy and the use of its balance sheet to support growth. The depreciation of the euro and falling oil prices should help boost exports and stimulate domestic demand. The US economy should stay on a positive track and the Fed is expected to begin tightening its monetary policy mid-year. Emerging countries have entered a phase of more moderate growth, in particular China. Russia’s economy is struggling with the consequences of the Ukrainian crisis coupled with the drop in commodity prices.

From a regulatory standpoint, 2014 saw the implementation of the Banking Union. The European Central Bank took the helm of the Single Supervisory Mechanism, overseeing some 130 euro zone banks, with the aim of strengthening the banking system, restoring the confidence of economic operators, harmonising banking supervision rules and reducing the link between banks and their national authorities.

In terms of regulatory ratios, the Group can already meet the new requirements.
